Project Proposal

Project Title:
CareerPath AI: An AI based Career Readiness and Skill Gap Analysis System for University students and fresh Graduates.

Introduction
CareerPath AI is a web-application that provides guidance to Pakistani University students and fresh graduates in selecting the right career path, based on their skills, interests and experience. It is done by recommending personalized careers, identifying career gaps and suggesting the right learning resources to enable the student to get ready for entry level IT jobs.

Objective
The primary objective of CareerPath AI is to build AI based web-application which will help IT students and fresh graduates in choosing a career path that is right for them based on their interests and skills.

Scope
The Scope of the system is that it will suggest career recommendations, skill gap analysis, learning activities, and progress tracking for three IT roles:
Frontend Developer, Backend Developer and Data Analyst. It will have user accounts, an admin module and basic testing system.

Expected Outcomes
The Expected Outcomes is to deliver a web application which will help and guide students in selecting the right career as of their interest.

Technologies
Flutter, Dart, Firebase, HTML, CSS, AI API, Git, Github
